

HEARTBURN AND REFLUX

1. Avoid spicy, acidic, tomato-based, or fatty foods like chocolate, citrus fruits, and fruit juices.
2. Limit your intake of coffee, tea, alcohol and colas.
3. Watch your weight (Being overweight increases intra-abdominal pressure, which can aggravate reflux).
4. Don't gorge yourself at mealtime. Eat moderate amounts of food.
5. Don't exercise too soon after eating.
6. Avoid bedtime snacks and eat meals at least 3 to 4 hours before lying down.
7. Stop (or at least cut down on) smoking.
8. Elevate the head of your bed with blocks.
9. See your physician if you are taking antacids three or more times a week.
